

Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

CIGOGNE UCITS - M&A Arbitrage, class C3 (LU0893376821)

a sub-fund of CIGOGNE UCITS

Management Company: Cigogne Management S.A.

Objectives and investment policy

Objectives

The objective of the sub-fund is to generate an absolute return. The sub-fund is actively managed and uses the Secured Overnight Financing Rate (SOFR), retrospectively, as an indicator to evaluate the performance of the sub-fund. There are no constraints relative to the index that limit the constitution of the portfolio.

Investment policy

The choice of the assets is guided by an arbitration of mergers and/or acquisitions, consisting in benefitting from the price differences which can appear at the time of takeover bids or exchange. With the aim to achieve its investment objective and policy, the sub-fund will mainly invest its net assets in equities.

In that end the investment strategy is to lock in or otherwise trade in the spread by purchasing (selling) securities of the target or subject of an announced merger, acquisition or contest for control and selling (buying) the deal consideration. Specifically, in case of tender offers, the investment strategy is built up to lock in the spread by purchasing securities subject to a cash or a mixed tender offer and tendering such securities while hedging the resulting long position until the term of the offer.

The investment strategy is essentially limited to the operations of declared mergers and/or acquisitions and is based on a solid and detailed analysis of the economic, legal and competitive frameworks. The sub-fund may also develop strategies on corporate action arbitrage such as preferential subscription rights / underlying shares arbitrage, new shares / old shares arbitrage and share class arbitrage.

The sub-fund is actively managed with reference to a benchmark.

Currency

The reference currency of the sub-fund is expressed in EUR.

The currency of the share class is expressed in USD.

For this share class, the foreign-exchange risk of the share currency is systematically hedged against the sub-fund's reference currency. However, due to the volatility of

the underlying portfolio, the SICAV cannot guarantee that the exchange-rate risk will be hedged 100%. Therefore, a residual foreign-exchange risk cannot be ruled out.

Financial instruments used

- Equities of companies essentially based in Europe and North America
- Financial derivatives instruments, such as but not limited to futures, options, equity swaps, contract for difference and currency derivatives
- Convertible bonds concerned by mergers and acquisitions
- Undertakings for Collective Investment in the limit of 10% of the Net Asset Value
- Cash deposits, short term papers, money-market instruments, bonds, new debt emissions, debt and currency Exchange Traded Funds.

Subscriptions / Redemptions

The investor has the right to redeem his shares on demand. The dealing in shares is carried out on each Friday or, if it is a bank holiday in Luxembourg, on the previous bank business day in Luxembourg. Subscription and redemption requests are centralized until 7 pm on the day D-2 (full Luxembourg bank business days) for execution on the closing price of day D (the "Valuation Day"). The settlement is D+2 (full Luxembourg bank business days) for subscriptions and D+5 (full Luxembourg bank business days) for redemptions.

Allocation of income

These shares are capitalisation shares. Income and capital gains are reinvested.

Recommendation

This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and reward profile

What does this synthetic indicator mean?

- The shares of class C3 are classified in category 4 because the value of the share may be subject to medium variations and consequently the risk of loss and the opportunity of gain may be moderate.
- The risk category has been determined on the basis of historical data and may not be a reliable indication of the future risk profile. The risk and reward category shown does not necessarily remain unchanged and the categorisation of the fund may shift over time.
- The lowest category does not mean a risk-free investment.
- Repayment of the initial investment is not guaranteed.

Which materially relevant risks are not adequately captured by the synthetic indicator?

- Impact of techniques used, as the use of derivatives or leverage.
- Counterparty risk linked to the use of over the counter derivatives.
- Credit risk linked to the investment on credit or monetary markets.
- The use of currency hedging techniques, hedging the currency of the share class against the currency of the sub-fund, aims at reducing the currency risks without, however, eliminating those risks totally.
- There may exist other risk factors that investors should take into consideration depending on their personal situation and particular circumstances in the present and future.

How can I get more information about the risks of the sub-fund?

Additional information concerning the risks of investment in the sub-fund is indicated in the corresponding section of the prospectus of the fund which is available at the Management Company and on the website www.cigogne-management.com.
