¹ Performances for the period prior to January 2026 are calculated based on the performances of Cigogne CLO Arbitrage - Europe.

PERFORMANCE (Net Asset Value)¹

DISTRIBUTION OF RETURNS (Monthly Basis)¹

¹ Performance and risk measures for the period prior to July 2023 are calculated on the basis of the performance of A units (no non-investable).

INVESTMENT MANAGERS' COMMENTARY

The performance of the CLO Arbitrage fund was -0.17%.

Financial markets evolved in a particular macroeconomic context over the month, marked by the resurgence of inflationary pressures and an intensification of geopolitical tensions in the Middle East. The escalation of the conflict involving the United States, Israel and Iran reignited fears of disruption to energy flows through the Strait of Hormuz, leading to sharp volatility in oil prices and knock-on effects across all asset classes. In the eurozone, inflation rebounded to 2.5% in March (versus 1.9% in February), driven by the energy component, while the composite PMI signalled a slowdown in activity. In the United States, inflation stood at 2.4% year-on-year at end-February, with the impact of the conflict not yet reflected in the figure. The labour market, for its part, remains resilient. This lack of visibility prompted the ECB and the Fed to keep their key interest rates unchanged. Monetary policy expectations nonetheless shifted markedly, with investors pricing in up to three rate hikes in Europe and a hold in the United States by year-end. In this environment, spreads in the secondary market widened across the entire capital structure, ranging from +14.5bps on the AAA tranche to +25bps on the A tranche (source: JPM). The lack of visibility and spread widening also triggered a marked slowdown in primary market activity, following a particularly active February. Issuance volume amounted to +€ 6.1 Bn over the month, bringing the total year-to-date volume to +€ 28 Bn, compared to +€ 29 Bn at end-March 2025. The widening of spreads on mezzanine tranches in particular made refinancings of existing transactions unattractive for CLO managers, with such deals accounting for only +€ 1.4 Bn during the month. A new strategy was nonetheless initiated mid-month on the CLO PSTET 26-1X by Palmer Square, a high-quality CLO manager, at a spread of 3-month Euribor + 100bps. The spreads of securities held in the portfolio experienced a smaller widening than the average observed on the AAA tranche, and the carry on the securities partially offset the portfolio's underperformance.

CIGOGNE FUND

CLO Arbitrage

31/03/2026

INVESTMENT OBJECTIVES

The aim of the CLO Arbitrage compartment is to invest in European Collateralized Loan Obligations (CLO).

Arbitrage strategies set forth in the Cigogne CLO Arbitrage Europe compartment consist in taking advantage of the credit component and the interest rate risk is systematically hedged. The portfolio is composed of prime CLO tranches with an average duration of less than 5 years and includes in average 30 positions.

As opposed to an ABS' collateral, the loan portfolio of a CLO is actively managed in order to achieve its performance objectives. The collateral manager picks the underlying loans based on his credit analysis, within the scope of the portfolio's eligibility requirements.

RISK PROFILE

The risk category has been determined on the basis of historical data and may not be a reliable indication of the future risk profile. The risk and reward category shown does not necessarily remain unchanged and the categorization of the fund may shift over time.

REASONS TO INVEST IN CIGOGNE CLO ARBITRAGE

In addition to traditional financial investment, alternative investments aim to provide investors with absolute performances independent from the return of traditional asset classes such as shares, bonds etc. With these objectives, alternative investments can be construed as the natural complement to assets allocation between classical portfolio investment and risks managed performance strategies that take advantages of market inefficiencies.

Cigogne Management S.A. is the alternative asset management branch of Crédit Mutuel Alliance Fédérale, a major actor in the industry. Cigogne Management S.A. benefits from CIC CIB's deep expertise. Cigogne Management S.A. currently manages the Cigogne Fund and Cigogne UCITS funds (single-strategy funds) as well as the Stork Fund (multi-strategy funds).

Cigogne Fund - CLO Arbitrage aims to achieve stable and positive performances over time, uncorrelated from traditional asset classes, by investing in European Collateralized Loan Obligations (CLO). The European CLO market offers an attractive risk/return profile and provides an alternative to "classic" credit funds, while preserving a certain liquidity.
