## What are the risks and what could I get in return?

### Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk

### Performance scenarios

Recommended holding period: 3 years Example investment: 10,000 EUR		If you exit after 1 year	If you exit after 3 years (recommended holding period)
<b>Scenarios</b>			
<b>Minimum</b>	<b>There is no minimum guaranteed return. You could lose some or all of your investment.</b>		
<b>Stress</b>	<b>What you might get back after costs</b>	7,830 EUR	8,250 EUR
	Average return each year	-21.7 %	-6.2 %
<b>Unfavourable</b>	<b>What you might get back after costs</b>	9,330 EUR	9,560 EUR
	Average return each year	-6.7 %	-1.5 %
<b>Moderate</b>	<b>What you might get back after costs</b>	10,100 EUR	10,290 EUR
	Average return each year	1.0 %	1.0 %
<b>Favourable</b>	<b>What you might get back after costs</b>	11,200 EUR	10,920 EUR
	Average return each year	12.0 %	3.0 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and of a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Unfavourable scenario: This type of scenario occurred for an investment between July 2019 and July 2022, by referring to a reference class.

class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

**Be aware of currency risk.** You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator:

- Derivatives risk,
- Counterparty risk,
- Other risks.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Moderate scenario: This type of scenario occurred for an investment between January 2015 and January 2018, by referring to a benchmark.

Favourable scenario: This type of scenario occurred for an investment between December 2021 and December 2024, by referring to a reference class.

The stress scenario shows what you might get back in extreme market circumstances.

## What happens if Cigogne Management S.A. is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depositary Banque de Luxembourg. Should we default, the investments are liquidated and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario
- 10,000 EUR is invested

	If you exit after 1 year	If you exit after 3 years
<b>Total costs</b>	271 EUR	852 EUR
Annual cost impact (*)	2.7 %	2.7 % each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.7% before costs and 1.0% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
