Credit Opportunities

Monthly Factsheet - July 2026

Assets Under Management : \$ 667 631 058

Net Asset Value - D1 Shares : \$ 1 035.91

INVESTMENT OBJECTIVES

The objective of the Cigogne UCITS - Credit Opportunities fund is to generate an absolute return by exploiting a multi-strategy approach focused on the Credit theme, while maintaining a low correlation with main market trends. The sub-fund implements strategies on different types of debt securities and other debt instruments issued by public and/or private issuers worldwide. These strategies can be broken down into four main areas: relative value strategies designed to profit from price anomalies amongst debt securities and/or financial derivatives; convertible bond arbitrage strategies seeking to take advantage of market anomalies that may occur between the various components of a convertible bond; credit strategies designed to profit from excess credit returns or price anomalies in the spread on debt securities and credit derivatives; global macro strategies implemented for hedging purposes or in order to take advantage of opportunities that may arise depending on market configurations.

INVESTMENT MANAGERS' COMMENTARY

In July, financial markets demonstrated resilience despite heightened geopolitical tensions. The military escalation between the United States and Iran was the dominant event of the month. Following the breakdown of the ceasefire announced by President Donald Trump, Iran blockaded the Strait of Hormuz, triggering an intensification of US strikes. This escalation briefly pushed Brent crude above \$100 per barrel, reviving fears of an oil shock. Against this backdrop, rising energy prices reignited inflationary pressures, prompting major central banks to adopt a cautious stance. The ECB left its key interest rates unchanged at its 23 July meeting. President Christine Lagarde reaffirmed that the institution was not committing to any rate-cut trajectory, as eurozone inflation rose to 2.9% in July, driven mainly by energy. The Fed likewise left rates unchanged, amid significant divergence among FOMC members. Despite this environment, financial markets showed solid resilience, supported by corporate earnings that broadly beat expectations. Credit markets widened only marginally, both on indices and in cash bonds. In equities, the Euro Stoxx 50 posted a modest gain of +0.5%, while the S&P 500 closed the month slightly lower at -0.1%.

The fund posted a positive return for the month, in a credit environment that remained particularly resilient despite elevated volatility, driven notably by the renewed US-Iran geopolitical tensions. Volatility arbitrage strategies were a significant contributor to performance, notably via Cellnex 11/31, which benefited from a strong share-price reaction following earnings. The High Yield segment also contributed positively, led by Edenred 06/28, whose results reassured the market, as well as Lagfin Campari 06/28, supported by the successful placement of its 2033 exchangeable bond. On the sovereign segment, the Colombia 01/29 exposure continued to contribute positively, amid a stabilization in monetary policy expectations following the central banks' tightening cycle. Investment Grade primary market activity remained subdued due to the seasonal summer slowdown, while several High Yield issues came to market, including Picard and Conceria Pasubio. The portfolio participated selectively in several primary deals, including Leasys 07/28 and Accenture 07/29, and executed a switch from BNP 08/28 into BNP 06/29C28, gaining better seniority for a comparable carry level. New positions were also initiated in Currenta 05/32, Orpar 06/33, and Indonesian sovereign debt 06/28. Finally, several strategies that reached their valuation targets were taken profit on, notably BPCE 09/28 and the Goldman Sachs 01/29C28 vs. CDS 06/30 curve steepener strategy, while Cembra 07/26 and South Africa 07/26 matured.
