INVESTMENT MANAGERS' COMMENTARY

The Stork DMS fund closed the first half of the year on a positive note.

June was marked by a calmer market tone, despite an initial flare-up in tensions between Israel and Iran, which was quickly defused by a ceasefire. This geopolitical de-escalation supported a gradual return of risk appetite. Oil prices, after a temporary spike, fell back below \$70 a barrel, reflecting expectations of a status quo around the Strait of Hormuz. In the US, signs of economic slowdown continued to accumulate, with Q1 growth revised downward and leading indicators deteriorating amid persistent trade tensions. Against this backdrop, the Federal Reserve kept rates unchanged. In the eurozone, the ECB maintained its accommodative stance by cutting rates once again. In this clearer environment, financial assets responded positively: credit spreads tightened across both Investment Grade and High Yield segments.

In a normalizing environment, all sleeves posted gains in June. The Credit segment stood out, supported by spread tightening after the "Liberation Day"-related bout of volatility. This move benefited carry and basis trade arbitrage strategies, with notable contributions from euro-denominated bonds such as Stellantis 03/27 and Bank of America 01/28. The pronounced slowdown in primary activity further supported this compression dynamic in the secondary market. In parallel, securitised credit funds, including ABS and CLOs, benefited from a supportive technical backdrop. Senior tranches saw a gradual tightening of spreads in a dynamic secondary market, underpinned by strong investor appetite for the asset class. In the Fixed Income sub-fund, yield differentials between Canadian and Australian provinces and their respective sovereigns continued to compress. The trend remains supportive across emerging markets, with euro-denominated bonds such as Mexico 2037 and Morocco 2035 outperforming versus swaps.

In the equity-linked universe, the Convertible sub-fund delivered an excellent performance, supported by a constructive environment for risk assets. The Contingent Convertibles pocket made a strong contribution, extending an already positive trend. On the corporate side, the exchangeable bonds Selena/Puma and Caixa/Cellnex reached maturity, allowing the positions to be closed in good conditions. The M&A sleeve also contributed positively, supported by the favourable outcome of the Juniper Networks deal, following the US DoJ's approval of its acquisition by Hewlett Packard. Finally, Small Cap strategies added value, particularly through Datagroup, whose share price rose more than 10% following the improved takeover offer from KKR.

Active management, particularly during the volatility episodes in April, enabled the fund to navigate periods of stress and seize market opportunities. This opportunistic positioning was a key driver of the fund's strong performance over the semester.

REASONS TO INVEST IN STORK FUND DYNAMIC MULTI-STRATEGIES ?

In addition to traditional financial investments, alternative investments allows investors to target a performance de-correlated from traditional asset classes (stocks, bonds). Resorting to arbitrage strategies benefiting from market inefficiencies, alternative investment becomes the natural complement to a traditional asset allocation.

CIC Marchés and Cigogne Management S.A. (respectively the capital markets division and the alternative asset management company of Crédit Mutuel Alliance Fédérale – head quarter of CIC) are historically important and well-known actors of the alternative asset management industry. Cigogne Management benefits from CIC Marchés' deep expertise and manages Cigogne Fund, Cigogne UCITS, Cigogne CLO Arbitrage (single-strategy hedge-funds) and Stork Fund (multi-strategy fund).

The fund of funds Stork Fund - Dynamic Multi-Strategies is well diversified and follows rigorous investment and risk management processes. The portfolio is reviewed on a regular basis depending on the opportunities and expectations of market trends.
