### INVESTMENT MANAGERS' COMMENTARY

The Stork DMS fund once again delivered a solid monthly performance, confirming the strong momentum observed in recent months. In August, the macroeconomic environment remained relatively stable. Political uncertainty in France and the UK continued to weigh on sovereign markets, with yields moving higher: the French 10-year OAT rose to 3.6% and the Bund spread widened to 80 basis points, while long-dated gilts experienced pronounced curve steepening. In the United States, the manufacturing ISM fell to 48.0 and the services ISM to 50.1, signaling contraction and slowdown respectively, while inflation accelerated to 2.7%. Jerome Powell confirmed a cautious Fed stance, while leaving the door open to a first rate cut as early as September. In Europe, growth remained weak at 0.1%, the labor market proved resilient, and inflation converged toward 2%, prompting the ECB to pause its rate-cutting cycle. Equities extended their summer rally, with the S&P 500 up 1.9% and the Eurostoxx 50 up 0.6%.

All compartments benefited from this environment. The Credit compartment gained from stable spreads and lower secondary liquidity, typical of the summer period, while taking profits on the best-performing Yankee bond, USD issues from non-US borrowers, such as Unicredit 6/27 and Walmart 4/30. The Investment Grade primary market remained active, and the fund participated in Schneider Electric 9/27 and Marriott 7/27 issues, both offering attractive risk/return profiles. The securitization segment also contributed positively, supported by spread tightening. The ABS compartment invested in the Auto Loan RBALF 2025-1 deal from CGI Finance, which was heavily oversubscribed and provided additional yield opportunities, while CLO spreads tightened in the secondary market, directly adding to performance. The Fixed Income compartment showed a more mixed pattern, with gains from Canadian province-versus-sovereign strategies on Québec 2035 and Ontario 2035, while UK positions were penalized by higher yields following the BoE's hawkish tone and concerns over the autumn budget.

In the equity segment, the M&A compartment extended its positive momentum, particularly in Small Caps. Two portfolio names stood out: Soho House surged nearly 40% after the announcement of its acquisition by a consortium, and Guess? advanced following its privatization deal with Authentic Brands Group, which included a 29% premium. Finally, the Convertible compartment ended the month slightly higher. The position in Glanbia 1.875% 01/2027 convertible bond was closed, capitalizing on elevated implied volatility, while exposure to the Air France 6.5% C25 perpetual was gradually reduced. These trades allowed the compartment to crystallize gains while adjusting the portfolio to market conditions.

### RISK PROFILE

The risk category has been determined on the basis of historical data and may not be a reliable indication of the future risk profile. The risk and reward category shown does not necessarily remain unchanged and the categorization of the fund may shift over time.

### REASONS TO INVEST IN STORK FUND DYNAMIC MULTI-STRATEGIES ?

In addition to traditional financial investments, alternative investments allows investors to target a performance de-correlated from traditional asset classes (stocks, bonds). Resorting to arbitrage strategies benefiting from market inefficiencies, alternative investment becomes the natural complement to a traditional asset allocation.

CIC Marchés and Cigogne Management S.A. (respectively the capital markets division and the alternative asset management company of Crédit Mutuel Alliance Fédérale – head quarter of CIC) are historically important and well-known actors of the alternative asset management industry. Cigogne Management benefits from CIC Marchés' deep expertise and manages Cigogne Fund, Cigogne UCITS, Cigogne CLO Arbitrage (single-strategy hedge-funds) and Stork Fund (multi-strategy fund).

The fund of funds Stork Fund - Dynamic Multi-Strategies is well diversified and follows rigorous investment and risk management processes. The portfolio is reviewed on a regular basis depending on the opportunities and expectations of market trends.
