INVESTMENT MANAGERS' COMMENTARY

The Stork DMS fund continued to advance in September, supported by a broadly favorable macroeconomic backdrop. During the month, financial markets extended their gains amid the onset of monetary easing in the United States. The Federal Reserve cut its target range to 4.00–4.25% in response to a more pronounced economic slowdown and weakening labor market conditions. Jerome Powell indicated that further easing would remain gradual, but additional rate cuts are expected before year-end. In the euro area, the ECB maintained its refinancing rate at 2.15%, while growth stabilized and inflation continued to converge toward target. Credit spreads tightened slightly, and equities continued to rise, driven by expectations of a soft landing.

All segments of the fund benefited from this renewed risk appetite. The Credit compartment gained from the tightening of Investment Grade spreads and a particularly active primary market. Several new issues were added to the portfolio, including Volkswagen Bank 10/28 Green and Zürcher Kantonalbank 09/31c30. At the same time, profit-taking occurred on Comcast 09/26 and Traton 08/26, while credit index and basis trade arbitrage performed strongly amid spread tightening, notably on UBS 09/27 and Santander 11/28. European ABS and CLO primary markets also proved highly active after the summer pause, allowing the fund to initiate new strategies across sectors such as auto leases, RMBS, and consumer loans. The Fixed Income compartment benefited from the return of emerging issuers such as Turkey and Mexico, quickly realizing gains following strong secondary market performance. In France, Fitch Ratings downgraded the sovereign rating to A+ (from AA-), and the compartment took advantage of this context to lock in profits on relative-value trades — long EU 2039 and 2045 vs. France 2040 and 2044.

In a market environment that remained supportive for risk assets, the Convertible compartment continued to progress, driven by the performance of CoCos and High Yield convertibles. Crédit Agricole 7.5% C30 and Figeac 1.75% 10/28 stood out, while participation in new issues such as ING 7% C32 and Forvia 5.375% 03/31 further enhanced portfolio diversification. Finally, the M&A compartment was supported this month by the Shelf Drilling / Ades Holding transaction, involving two oilfield services specialists. The acquirer raised its offer by over 30% following further due diligence. In addition, the late-month rally in Allete, a U.S. utility company awaiting final regulatory approval expected in early October, provided an opportunity to take profits, as the remaining upside no longer justified the residual deal risk.

REASONS TO INVEST IN STORK FUND DYNAMIC MULTI-STRATEGIES ?

In addition to traditional financial investments, alternative investments allows investors to target a performance de-correlated from traditional asset classes (stocks, bonds). Resorting to arbitrage strategies benefiting from market inefficiencies, alternative investment becomes the natural complement to a traditional asset allocation.

CIC Marchés and Cigogne Management S.A. (respectively the capital markets division and the alternative asset management company of Crédit Mutuel Alliance Fédérale – head quarter of CIC) are historically important and well-known actors of the alternative asset management industry. Cigogne Management benefits from CIC Marchés' deep expertise and manages Cigogne Fund, Cigogne UCITS, Cigogne CLO Arbitrage (single-strategy hedge-funds) and Stork Fund (multi-strategy fund).

The fund of funds Stork Fund - Dynamic Multi-Strategies is well diversified and follows rigorous investment and risk management processes. The portfolio is reviewed on a regular basis depending on the opportunities and expectations of market trends.
