b) Valuation of the assets

1. The value of cash on hand or on deposit, bills and notes due on demand, accounts receivable, prepaid expenses, dividends, and interest declared or due but not yet received consists of the nominal value of these assets, unless it is unlikely that this value will be received, in which event, the value is determined by deducting an amount which the SICAV deems adequate to reflect the real value of these assets.

4. The value of any open-ended undertaking for collective investment is determined according to the last official net asset value per unit or according to the last estimated net asset value if it is more recent than the official net asset value, and provided that the SICAV is assured that the valuation method used for this estimate is consistent with that used for the calculation of the official net asset value.
